This comprehensive guide will walk you through the basics of keyboard chords, provide detailed charts, and offer practical tips to master these essential harmonies.

Understanding Keyboard Major and Minor Chords

What Are Chords?

Chords are groups of notes played simultaneously that form the harmonic foundation of music. On the keyboard, chords are built by stacking specific intervals (distances between notes), primarily thirds, to create a harmonious sound. The most common chords in Western music are major and minor chords, which serve as the building blocks for countless songs and musical styles.

Major vs. Minor Chords

- Major chords have a bright, happy sound. They are constructed using a root note, a major third, and a perfect fifth.
- Minor chords have a sadder or more somber tone. They are built with a root note, a minor third, and a perfect fifth.

Understanding the difference in construction is key to mastering keyboard chords.

How to Play Major and Minor Chords on the Keyboard

Basic Formula for Chord Construction

- Major chord: Root + Major Third (4 semitones above root) + Perfect Fifth (7 semitones above root)
- Minor chord: Root + Minor Third (3 semitones above root) + Perfect Fifth (7 semitones above root)

Playing Chords: Step-by-Step

- Identify the root note: This is the starting point of the chord.
- Build the third: Count the semitones from the root to find the third (major or minor).
- Add the fifth: Count up to the perfect fifth.
- Play all notes simultaneously: Use fingers to press all three keys at once.

Common Inversions and Voicings

- Root position: Root note at the bottom.
- First inversion: The third is at the bottom.
- Second inversion: The fifth is at the bottom.

Inversions are useful for smooth chord progressions and varied voicings.

The Basics of Major and Minor Chord Construction

Major Chords

A major chord has a happy, bright sound. It is built from three notes:

- The root (the note the chord is named after)
- The major third (4 semitones above the root)
- The perfect fifth (7 semitones above the root)

Example: C major chord (C - E - G)

Minor Chords

A minor chord has a more somber or melancholic tone. It also consists of three notes:

- The root
- The minor third (3 semitones above the root)
- The perfect fifth (7 semitones above the root)

Example: A minor chord (A - C - E)

Visualizing Major and Minor Chords on the Keyboard

The Keyboard Diagram

The keyboard is a series of repeating patterns of black and white keys. Each octave contains 12 semitones, with black keys arranged in groups of twos and threes.

Major chords are built by starting on a root note, then counting four semitones up for the major third, and then three more semitones for the perfect fifth.

Minor chords are built by starting on a root note, counting three semitones for the minor third, then adding four semitones for the perfect fifth.
