Understanding the 2013 Altima Sedan Front Door Finisher

Before diving into removal and installation procedures, it's important to understand what the front door finisher is and its role in your vehicle.

What Is the Front Door Finisher?

The front door finisher, also known as a door trim or door molding, is a decorative and protective trim piece that lines the interior edge of the front door. It covers the seam between the door panel and the window frame, providing a clean, finished look while protecting the door's edge from scratches, dents, and corrosion.

Materials and Components

- Typically made from plastic, aluminum, or a combination of both.
- May include clips or fasteners for secure attachment.
- Often designed to match the vehicle's interior or exterior styling.

Tools and Materials Needed

Before starting the removal process, gather the necessary tools and materials to ensure a smooth operation:

- Screwdrivers (Phillips and flat-head)

- Trim removal tools (plastic pry tools)
- Panel removal tool (optional but recommended)
- Replacement clips or fasteners (if needed)
- Adhesive remover (if adhesive is involved)
- Clean cloths and mild cleaning solution
- Safety gloves and eye protection (optional)

Preparation Before Removal

Proper preparation ensures the safety of both the vehicle and yourself, and helps prevent damage to the finisher or surrounding components.

Steps for Preparation

- Park your vehicle on a flat, stable surface and engage the parking brake.
- Disconnect the negative terminal of the battery to prevent accidental electrical issues, especially if the finisher has any integrated lighting or electronics.
- Clear the area around the door to give yourself ample working space.
- Inspect the finisher for visible fasteners or clips to understand how it is attached.
- Use a clean cloth to wipe the area and remove dust or debris that could interfere with removal.

Removing the Front Door Finisher

Removing the finisher requires patience and attention to detail to avoid damage.

Step-by-Step Removal Process

- **Identify the fasteners:** Examine the finisher for visible screws, clips, or adhesive points. Most models are held with clips or push-in fasteners.
- **Remove any screws:** Using the appropriate screwdriver, carefully unscrew any visible screws securing the finisher. Keep screws in a safe place for reinstallation.
- **Loosen the clips:** Use a trim removal tool or plastic pry tool to gently pry the finisher away from the door. Start at one end and work your way along the length.
- **Work slowly and evenly:** Apply even pressure to prevent bending or cracking the finisher. If you encounter resistance, double-check for hidden clips or fasteners.
- **Release the clips:** When the finisher begins to loosen, carefully detach it from the door frame, making sure not to damage the clips or the door surface.
- **Disconnect any electronic connectors (if applicable):** If your finisher has integrated lighting or electronic components, gently disconnect connectors before completely removing the piece.

- **Remove the finisher:** Once all fasteners and clips are detached, carefully lift the finisher away from the door.

Tips for a Successful Removal

- Use a plastic trim tool to prevent scratching or damaging the paint.
- Work gradually and avoid forcing the finisher, which could lead to breakage.
- Take photos during the process to remember clip and screw placements.

Installing the Front Door Finisher

Reinstallation is essentially the reverse process of removal, with attention to detail to ensure a proper fit.

Step-by-Step Installation Process

- **Inspect and prep the finisher:** Check for any damage or missing clips. Replace clips if necessary.
- **Align the finisher:** Position the finisher so that all clips and screw holes align properly with the door frame.
- **Engage the clips:** Starting at one end, press the finisher firmly into place to snap the clips into their respective slots. Use your hands or a trim tool to ensure full engagement.
- **Secure with screws:** If your finisher uses screws, insert and tighten them carefully without overtightening, which could crack the material.
- **Reconnect electronic components:** If applicable, reconnect any electronic connectors or wiring, ensuring a snug fit.
- **Check alignment and fit:** Ensure the finisher sits flush against the door surface and that there are no gaps or misalignments.
- **Test the door operation:** Open and close the door to verify that the finisher does not interfere with movement or sealing.
- **Clean the area:** Wipe down the finisher and surrounding areas to remove fingerprints, dust, or debris.

Tips for a Successful Installation

- Use gentle pressure when snapping clips into place to avoid breaking them.
