Structure of ISO 8062-3 EVS

The standard is organized into sections that detail the classification rules, tolerance codes, and application guidelines.

Main Components

- Tolerance classification system: Defines the codes and levels for different casting types.
- Shape and size categories: Differentiates between simple and complex geometries.
- Tolerance grades: Ranges from high precision (e.g., very tight tolerances) to general purpose.
- Surface quality specifications: Includes surface roughness and finish indicators.

Understanding the Classification System

ISO 8062-3 EVS employs a coding system to categorize castings and their corresponding tolerances.

Tolerance Codes

- T: Tolerance class (e.g., T1 to T6, with T1 being the most precise)
- S: Shape complexity (e.g., S1 for simple shapes, S2 for complex)
- L: Size category (e.g., L1 for small, L2 for medium, L3 for large dimensions)

Applying Tolerance Codes

For example, a casting designated as T4 S2 L2 indicates a specific tolerance class for a complex-shaped, medium-sized casting requiring a moderate degree of precision.

Tolerance Grades and Their Significance

Tolerance grades determine the permissible deviations from specified dimensions.

Grade	Description	Typical Applications
-----	-----	-----
T1-T2	Very high precision, tight tolerances	Aerospace components, high-precision machinery
T3-T4	Moderate to high precision	Automotive parts, structural components
T5-T6	General purposes, wider tolerances	Non-critical structural elements, decorative castings

Manufacturers select the appropriate grade based on functional requirements, cost considerations, and manufacturing capabilities.

Surface Quality and Finish

ISO 8062-3 EVS also stipulates surface quality parameters, including:

- Surface roughness (Ra values): Dictates the smoothness of the casting surface.
- Surface finish codes: Indicate machining or polishing requirements.
- Visual and tactile inspection criteria: Ensures surface imperfections are within acceptable limits.

Proper adherence to these surface quality standards ensures optimal performance and aesthetic appeal.

Inspection and Verification Procedures

To guarantee compliance with ISO 8062-3 EVS, rigorous inspection processes are vital.
