The book discusses several core concepts that underpin all accounting activities:

- **Accrual Basis of Accounting:** Recognizes income and expenses when they occur, not necessarily when cash is received or paid.
- **Consistency Principle:** Ensures uniform application of accounting methods across periods for comparability.
- **Going Concern Assumption:** Assumes the business will continue to operate indefinitely unless there is evidence to the contrary.
- **Materiality:** Focuses on information that could influence economic decisions of users.
- **Prudence (Conservatism):** Encourages cautious reporting to avoid overstatement of financial position.
- **Matching Principle:** Aligns expenses with related revenues in the same accounting period.

Accounting Equations and Framework

- Debits = Credits

This system ensures the accounting equation remains in equilibrium and forms the basis for trial balances and financial statements.

Historical Cost vs. Fair Value

The book discusses the importance of recording assets at their historical cost while recognizing that fair value measurements may be necessary for certain assets and liabilities.

Accounting Standards and Ethical Principles

Frank Wood emphasizes adherence to established accounting standards (such as IFRS and GAAP) to promote transparency and comparability. Ethical principles like integrity, objectivity, and professional competence are stressed as essential for credible accounting.

Analyzing Financial Statements Based on Principles

The principles discussed influence how financial statements are prepared and interpreted.

Balance Sheet

Reflects the financial position of a business at a specific point in time, based on principles like consistency and relevance.

Income Statement

Shows profitability over a period, adhering to the matching principle and accrual basis.

Cash Flow Statement
